

INDEPENDENT ASSURANCE STATEMENT

To: OMRON Corporation

Bureau Veritas Japan Co., Ltd. (Bureau Veritas) has been engaged by OMRON Corporation (OMRON) to provide limited assurance and to conduct an external review over sustainability information selected by OMRON. This Assurance Statement applies to the related information included within the scope of work described below.

Selected information

The scope of our assurance work was limited to assurance over the following information included within the 'Sustainability Data' page of the OMRON's corporate website (the 'Website') or reported internally to OMRON Group only for the purpose of internal management for the period of April 1, 2023 through March 31, 2024 (the 'Selected Information'):

- 1) GHG emissions (CO₂, CH₄, N₂O, HFCs, PFCs, SF₆ and NF₃) through business operations of OMRON Group's 90 sites both inside and outside Japan.
However, CO₂ emissions generated from use of electricity for living use at OMRON DALIAN CO., LTD. are out of verification scope.
- 2) Water usage and Waste water discharged through business operations of OMRON Group's 29 sites both inside and outside Japan.
- 3) Waste volume, Final disposal of waste, Hazardous waste volume and Final disposal of hazardous waste through business operations of OMRON Group's 59 sites both inside and outside Japan.
Note: The scope of 'hazardous waste' was defined by OMRON with consideration of laws and regulations.
- 4) VOC handled and VOC released to air through business operations of OMRON Group's 28 sites both inside and outside Japan.
- 5) Renewable energy purchased or generated at OMRON Group's 90 sites both inside and outside Japan.
- 6) Categories 1, 2 and 3 of Scope 3 GHG emissions accounted and reported in line with the GHG Protocol's 'Corporate Value Chain (Scope 3) Accounting and Reporting Standard' within the boundaries defined by OMRON for each category.
- 7) Carbon Productivity (Global sales / CO₂ emissions from global production sites)

The scope of our review work was limited to review about the following information included within the 'Sustainability Data' page of the Website for the period of April 1, 2023 through March 31, 2024 (the 'Selected Information'):

- 1) The amount of contribution to CO₂ emission reduction through the use of products and services sold in FY2023
Note: The boundaries and accounting methodologies are defined by OMRON.

Reporting criteria

The Selected Information included within the Website needs to be read and understood together with the reporting criteria stated in the Website.

The Selected Information reported internally to OMRON Group only for the purpose of internal management needs to be read and understood together with the internal reporting criteria defined by OMRON.

Limitations and Exclusions

Excluded from the scope of our work is any verification of information relating to:

- Activities outside the defined verification period;
- Any other information within the Website, which is not listed as the 'Selected Information'.

This limited assurance engagement relies on a risk based selected sample of sustainability data and the associated limitations that this entails. This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist.

Responsibilities

This preparation and presentation of the Selected Information in the Website are the sole responsibility of the management of OMRON.

Bureau Veritas was not involved in the drafting of the Website or of the Reporting Criteria. Our responsibilities were to:

- obtain limited assurance about whether the Selected Information has been prepared in accordance with the Reporting Criteria by conducting our assurance work;
- assess the reliability and accuracy of the Selected Information by conducting our review work;
- form an independent conclusion based on the procedures performed and evidence obtained;
- and
- report our conclusions to the Directors of OMRON.

Assessment Standard

We performed our assurance work in accordance with International Standard on Assurance Engagements (ISAE) 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information (Effective for assurance reports dated on or after December 15, 2015) issued by the International Auditing and Assurance Standards Board and ISO14064-3 (2019): Greenhouse gases - Part 3: Specification with guidance for the verification and validation of greenhouse gas statements.

We performed our review work by using Bureau Veritas' standard procedures for external review of sustainability information.

Summary of work performed

As part of our independent verification, our work included:

1. Conducting interviews with relevant personnel of OMRON;
2. Reviewing the data collection and consolidation processes used to compile Selected Information, including assessing assumptions made, and the data scope and reporting boundaries;
3. Reviewing documentary evidence provided by OMRON;

4. Reviewing OMRON systems for quantitative data aggregation and analysis;
5. Verification of sample of data back to source by carrying out four physical site visits, selected on a risk based bases at the following locations:
 - OMRON Corporation Head Office
 - OMRON Corporation Ayabe Plant
 - OMRON RELAY & DEVICES Corporation Takeo Factory
 - Omron Healthcare Manufacturing Vietnam Co., Ltd.
6. Reperforming a selection of aggregation calculations of the Selected Information;
7. Comparing the Selected Information to the prior year amounts taking into consideration changes in business activities, acquisitions and disposals.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement.

Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Verified greenhouse gas emissions

We performed our verification work on greenhouse gas emissions data in accordance with the requirements of ISO14064-3(2019).

Verified data in greenhouse gas assertion made by OMRON are as follows.

	Greenhouse gas emissions [t-CO ₂ e]	Boundary
Scope 1	3,727	GHG emissions (CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ and NF ₃) through business operations of OMRON Group's 90 sites both inside and outside Japan. However, CO ₂ emissions generated from use of electricity for living use at OMRON DALIAN CO., LTD. are out of verification scope.
Scope 2 (market-based)	74,702	
Scope 3 (Category 1, 2 and 3)	2,412,928	Categories 1, 2 and 3 of Scope 3 GHG emissions accounted and reported in line with the GHG Protocol's 'Corporate Value Chain (Scope 3) Accounting and Reporting Standard' within the boundaries defined by OMRON for each category.

The breakdown of Scope 3 emissions are as follows.

Category 1 : 2,169,811 t-CO₂e | Category 2 : 116,944 t-CO₂e | Category 3 : 126,173 t-CO₂e

Conclusion

On the basis of our methodology and the activities described above:

- Nothing has come to our attention to indicate that the Selected Information has not been properly prepared, in all material respects, in accordance with the Reporting Criteria;
- It is our opinion that OMRON has established appropriate systems for the collection, aggregation and analysis of quantitative data within the scope of our work.

Statement of Independence, Integrity and Competence

Bureau Veritas is an independent professional services company that specialises in quality, environmental, health, safety and social accountability with over 190 years history. Its assurance team has extensive experience in conducting verification over environmental, social, ethical and health and safety information, systems and processes.

Bureau Veritas operates Quality Management System which complies with the requirements of globally recognized quality management standard, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards, quality reviews and applicable legal and regulatory requirements which we consider to be equivalent to ISQM 1 & 2¹.

Bureau Veritas has implemented and applies a Code of Ethics, which meets the requirements of the International Federation of Inspections Agencies (IFIA)², across the business to ensure that its employees maintain integrity, objectivity, professional competence and due care, confidentiality, professional behavior and high ethical standards in their day-to-day business activities. We consider this to be equivalent to the requirements of the IESBA code³.
